Class. 6 Maths solution(By:Prashant kr.)
10.Mensuration
Ex-10.2
Q.1Find the areas of the following figures by counting square :

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (a) |  |  |  | (b) |  |  |  | (c) | - |  | , |  |  | (d) |  |  |  |
|  |  |  |  |  |  |  |  |  |  | - |  | $\checkmark$ |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| (e) |  |  |  |  |  | (f) |  |  |  |  | (g) |  |  | - |  |  |  |
|  |  |  |  |  |  |  |  |  | 7 |  |  | $\checkmark$ |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| (h) |  |  |  |  |  | (i) |  |  |  |  |  | (i) |  |  | - |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  | $\pi$ |  |  | - |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| (k) | 7 |  | $\checkmark$ |  | (I) |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  | ) |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  | - |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## SOLUTION:

(a) Number of fully-filled squares $=9$
$\therefore$ Area covered by fully-filled squares
$=(9 \times 1)$ sq. units $=9$ sq. units
(b) Number of fully-filled squares $=5$
$\therefore$ Area covered by fully-filled squares
$=(5 \times 1)$ sq. units $=5$ sq. units
(c) Number of fully-filled squares $=2$

Number of half-filled squares $=4$
$\therefore$ Area covered by fully-filled squares
$=(2 \times 1)$ sq. units $=2$ sq. units
Area covered by half-filled squares
$=(4 \times 1 / 2)$ sq. units $=2$ sq. units
$\therefore$ Total area $=(2+2)$ sq. units $=4$ sq. units
(d) Number of fully-filled squares $=8$
$\therefore$ Area covered by fully-filled squares
$=(8 \times 1)$ sq. units $=8$ sq. units
(e) Number of fully-filled squares $=10$
$\therefore$ Area covered by fully-filled squares $=(10 \times 1)$ sq. units $=10$ sq. units
(f) Number of fully-filled squares $=2$

Number of half-filled squares $=4$
$\therefore$ Area covered by fully-filled squares
$=(2 \times 1)$ sq. units $=2$ sq. units
Area covered by half-filled squares
$=(4 \times 1 / 2)$ sq. units $=2$ sq. units
$\therefore$ Total area $=(2+2)$ sq. units $=4$ sq. units
(g) Number of fully-filled squares $=4$

Number of half-filled squares $=4$
$\therefore$ Area covered by fully-filled squares
$=(4 \times 1)$ sq. units $=4$ sq. units
Area covered by half-filled squares
$=(4 \times 1 / 2)$ sq. units $=2$ sq. units
$\therefore$ Total area $=(4+2)$ sq. units $=6$ sq. units
(h) Number of fully-filled squares $=5$
$\therefore$ Area covered by fully-filled squares
$=(5 \times 1)$ sq. units $=5$ sq. units
(i) Number of fully-filled squares $=9$
$\therefore$ Area covered by fully-filled squares
$=(9 \times 1)$ sq. units $=9$ sq. units
(j) Number of fully-filled squares $=2$

Number of half-filled squares $=4$
$\therefore$ Area covered by fully-filled squares
$=(2 \times 1)$ sq. units $=2$ sq. units
Area covered by half-filled squares $=(4 x 1 / 2)$ sq. units $=2$ sq. units
$\therefore$ Total area $=(2+2)$ sq. units $=4$ sq. units
(k) Number of fully-filled squares $=4$

Number of half-filled squares $=2$
$\therefore$ Area covered by fully-filled squares
$=(4 \times 1)$ sq. units $=4$ sq. unit
Area covered by half-filled squares
$=(2 \times 1 / 2)$ sq. units $=1$ sq. units
$\therefore$ Total area $=(4+1)$ sq. units $=5$ sq. units
(I) Number of fully-filled squares $=2$,

Number of half-filled squares $=0$,
Number of more than half-filled squares $=6$
and number of less than half-filled squares $=6$.
Now, estimated area covered by
fully-filled squares $=2$ sq. units,
half filled squares $=0$ sq. units
more than half-filled squares $=6$ sq. units
and less than half-filled squares $=0$ sq. unit
$\therefore$ Total area $=(2+0+6+0)$ sq. units $=8$ sq. units.
(m) Number of fully-filled squares $=5$

Number of more than half-filled squares $=9$
and number of less than half-filled squares $=12$
Estimated area covered by
fully-filled squares $=5$ sq. units
more than half-filled squares $=9$ sq. units
and less than half-filled squares $=0 \mathrm{sq}$. unit
$\therefore$ Total area $=(5+9+0)$ sq. units $=14$ sq. units
(n) Number of fully-filled squares $=8$

Number of more than half-filled squares $=10$
and number of less than half-filled squares $=9$
Estimated area covered by
fully-filled squares $=8$ sq. units,
more than half-filled squares $=10$ sq. units
less than half-filled squares $=0$ sq. unit
$\therefore$ Total area $=(8+10+0)$ sq. units $=18$ sq. units.
