

# The Kite

\* Harry Behn

## Explanation of the poem :-

A kite looks very bright and beautiful on a clear sky when it flies for the first time. It moves with softness and force together at the same time. Its tail creates a crackling sound in the air. Sometimes, it goes up to the highest point in the sky in a wavy manner like the way a ship moves on the ocean. But when the wind falls it comes to rest.

When the thread looses due to slow wind, you have to wind it back and run until the strong breeze blows to fly the kite. The poet says that such movement of the kite looks very beautiful in the sky. But when it gets stuck on a tree top or anything else, it gets torn and gives a very poor worn out look which is not liked by anyone.
