## Question 5:

## Copy the figure given here:

Take any one diagonal as a line of symmetry and shade a few more squares to make the figure symmetric about a diagonal. Is there more than one way to do that? Will the figure be symmetric about both the diagonals?

Answer 5:
Answer figures are:

Yes, there is more than one way.
Yes, this figure will be symmetric about both the diagonals.

(d)
E.Answer 6:

(a)

(c)

(b)

(d)

## Question 7:

State the number of lines of symmetry for the following figures:

## Question 8:

What letters of the English alphabet have reflectional symmetry (i.e., symmetry related to mirror reflection) about.
(a) a vertical mirror
(b) a horizontal mirror
(c) both horizontal and vertical mirrors
E.Answer 8:
(a) Vertical mirror - A, H, I, M, O, T, U, V, W, X and Y

| mirror |  | mirror |  |

What other name can you give to the line of symmetry of:
(a) an isosceles triangle?
(b) a circle?
E. Answer 10:
(a) The line of symmetry of an isosceles triangle is median or altitude.
(b) The line of symmetry of a circle is diameter.
